## ePortfolio Update – 29 July 2016

Now that ePortfolio v2 is live, a plan for updating the system with historic, paper-based assessment data (both for those Registrars who started training in August 2015 and those who have transitioned to the new curriculum) has been finalised. Work is underway to prepare the back-end functionality of ePortfolio to facilitate the implementation of these updates in such a way that Registrars are not required to upload any data themselves. Further information and instruction will be sent when the system is prepared, which we hope will be early next week.

As reported in our previous communication, work continues with implementation of refinements to ePortfolio v2 in the live environment and with a download function which will allow Registrars to extract key data from the system, including Activity Summary Sheets and progress reports.

We will provide a further communication on Wednesday 03 August.

Kind regards,  
FPH Education & Training Team
